**Subject:** Re: FOR REVIEW: PFAS Statement

A question and one small edit from ORD

The wells statement is likely to raise questions by residents with wells, how do I get my water tested and why is it not doing that for me? Maybe the region can help qualify that.

Small error, change 'don't break down' to 'break down very slowly'.

Thanks!  
Lahne

Hi all—

Please find attached an updated statement that reflects input from OEM and from the call with Region 6 this afternoon. David, I was hoping you could work with Ronnie and his team on the review of the document, but I am more than happy to work directly with him if that would be better/easier for you at this point. Just let me know. HQ folks please work with your teams to provide any input your office may have.

As far as incorporating comments, I will keep the pen and will provide a clean draft to this group after I've received comments from everyone. I can then circulate it to the senior leadership group David emailed yesterday as well as our political leadership in OPA for their review.

Nancy, since this is PFAS-related, do you think someone should give Ryan a heads up? Or anyone else in the AO? I'm not suggesting we do that, but I did want to raise it just in case.

We can continue to build out the Q&As, so please feel free to add to what I've included.
